Kymera Therapeutics Announces Proposed Public Offering

November 23, 2026

WATERTOWN, Mass., Nov. 23, 2026 (GLOBE NEWSWIRE) -- Kymera Therapeutics, Inc. (NASDAQ: KYMR), a clinical-stage biopharmaceutical company advancing a new class of oral small molecule degrader medicines for immunological diseases, today announced that it has commenced an underwritten public offering of $1.5 billion of shares of its common stock. All of the shares of common stock to be sold in this offering are being offered by Kymera. In addition, Kymera intends to grant the underwriters a 30-day option to purchase up to an additional $225 million of shares of its common stock at the public offering price per share, less underwriting discounts and commissions. The proposed offering is subject to market and other conditions, and there can be no assurance as to whether or when the offering may be completed, or as to the actual size or terms of the offering.

Kymera intends to use the net proceeds from the offering to continue to advance its pipeline of preclinical and clinical degrader programs that are designed to address large patient populations with significant need and clear commercial opportunity, and for working capital and other general corporate purposes.

Morgan Stanley, J.P. Morgan, Jefferies, TD Cowen, Goldman Sachs & Co. LLC, Stifel and Wells Fargo Securities are acting as joint book-running managers for the offering.

The securities described above are being offered pursuant to an automatically effective shelf registration statement on Form S-3 (No. 333-282912) that was filed with the U.S. Securities and Exchange Commission (the “SEC”) on October 31, 2024. This offering is being made only by means of a prospectus supplement and an accompanying prospectus that form a part of the registration statement.

A preliminary prospectus supplement related to and describing the terms of the offering will be filed with the SEC and will be available on the SEC’s website located at www.sec.gov. About Kymera Therapeutics

Kymera is a clinical-stage biotechnology company pioneering the field of targeted protein degradation (TPD) to develop medicines that address critical health problems and have the potential to dramatically improve patients’ lives. Kymera is deploying TPD to address disease targets and pathways inaccessible with conventional therapeutics. Having advanced the first degrader into the clinic for immunological diseases, Kymera is focused on building an industry-leading pipeline of oral small molecule degraders to provide a new generation of convenient, highly effective therapies for patients with these conditions. Founded in 2016, Kymera has been recognized as one of Boston’s top workplaces for the past several years.
